A Closer Look at DCG's Service Offerings

BUSINESS SOLUTIONS

DCG understands businesses are comprised of three components: people, processes, and decisions. These areas look different at every company, and DCG takes the time to understand them before providing a forward-looking digital platform that supports growth and stability.

MODERN WORKPLACE & CLOUD

DCG believes the Cloud isn't just a place – it's a model. By helping businesses leverage Microsoft's cloud resources the way they're designed to be used, DCG's clients and partners accelerate business and reduce costs.

ENTERPRISE RESOURCE PLANNING (ERP)

The best way to solve a financial or supply chain business challenge is to understand the way business operates. That's why DCG assess workflow first, identifies areas of opportunity second, and applies technology with experience to provide the right solution.

DATA TRANSFORMATION

Every business is different, which is why teams often say "I wish we could just do this.." when working with out-of-the-box solutions. Through custom code and application development, DCG helps businesses map their technology to their business practices.

TALENT DEVELOPMENT & PLACEMENT

True to DCG's values, Power Learn Academy focuses on continuous self-improvement. This unique business apprenticeship provides day-one ready Microsoft Functional Consultants at an affordable rate. Whether you're looking for guaranteed retention from a skilled new hire or training options for current project teams, Power Learn is your trusted solution for Microsoft talent.

MICROSOFT SUPPORT

When DCG brought services like enterprise resource planning, business solutions, modern workplace & cloud, and data transformation to the market, it only made sense to offer support alongside them. By working with a DCG support engineer, you're also tapping into expertise of each of our consultants, from every practice.

We provide flexible, rapid-response support that can fix your immediate issue and address the underlying cause to ensure it doesn't happen again.

PROJECT SUCCESS MANAGEMENT

Don't worry about staffing your project with someone to keep it on track and on-budget, we have you covered. We pride ourselves in managing projects fluidly while providing structure to finish on time and without extra costs.

> "Our experience with Dynamic Consultants Group has been outstanding so far. They display a deep understanding of our business requirements and work closely with us to map out a comprehensive plan for our implementation project. It was also completed in a timely manner."
