Power Learn
ACADEMY

Power Learn
Partner Models

Contract Model

Created to supply resources on a project-by-project basis, functional consultants augment your project team at an affordable weekly rate.

Placement Model

Designed to provide individual full-time resources fast, Power Learn apprentices are interviewed and hired as official employees of your organization.

Franchise Model

To standardize your training program, a turnkey option is provided to independently recruit and train your new resources.

Upskill Model

Built to empower retention, your existing resources train on new software or deepen their knowledge as students in Power Learn Academy.

It's no secret that good talent in the technology industry is difficult to find at an affordable rate. We analyzed the market and found that artificially inflated salaries, lack of localized experience, and high barriers to entry for new talent are all contributing factors. To stop the recruitment insanity, we created Power Learn Academy. By recruiting, vetting, training, and certifying fresh talent, we're providing low-cost resources that are ready for billable consulting roles from day one.

" [My resource] is very detail oriented and very good at testing and training. A lot of developers can be lacking in personality, but [my resource] has that and he's able to converse with the client easily. That means a lot. You can have someone that knows everything technical, but if they don't get along with the client, then they're not going to stick around anyway. "

- Mark Blevins, Aviate Technologies

Power Learn FAQs

What are Power Learn graduates knowledgeable in?

Power Learn graduates complete the program with hands-on experience in consulting, computer science, and project management. Additionally, they are knowledgeable in development, Microsoft technologies, Dynamics 365, Portal and Power Apps, Power BI and SSRS/SSIS, Business Central and Finance and Supply Chain Management, SQL, as well as interviewing and personal branding.

How soon can they start?

Resources can start immediately after graduating from Power Learn. You can select and hire them during their training, but their actual start date will follow the program. Since all resources are billed T&M, you can lock them in, but not spend a dollar until they are on your project.

How many graduates can I hire at one time?

The amount of resources you can hire depends on the partner model you select. With the Contract and Placement models, you may hire as many individuals as Power Learn has available. Through Franchise models, you can determine how many resources you'd like to hire and when.

Can Power Learn apprentices actually do the work?

Yes. Post-graduation, Power Learn apprentices are assigned a Senior Solution Architect as a mentor and immediately begin working in a team environment and producing on client projects. Working on these projects with a mentor helps them continue to gain valuable experience and additional skills quickly, rounding out their capabilities and adding to their Microsoft Certifications as they progress. We like to say that our Power Learn apprentices are plugged into the "big DCG brain" by benefiting from the expertise of Dynamic Consultants Group.
